

Electrical Meter Frames—EMF

Proudly Designed and Manufactured in Australia

EMF can provide panels or complete enclosures pre-drilled to your requirements.

Remove the stress of marking and drilling panels in the field. EMF only use approved switch panels, and with the aid of templates, accurately position all components in accordance with Victorian SIR.

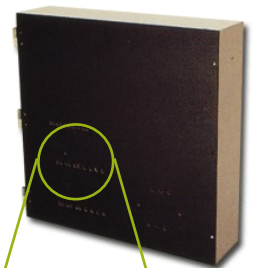

We can also fit fuses and neutral links providing further efficiencies.

All EMF products and services are available through your electrical wholesaler.

Why get pre-drilled?

- **Save Time**
Free up your time for more important tasks
- **Save Money**
Speed up installations and reduce the risk of costly mistakes from incorrectly drilled panels
- **Reduce Risk**
All EMF panels are prepared in accordance with Victorian Service Installation Rules
- **Proven Finish**
Using templates we accurately produce any required layout, ensuring correct mounting and spacing for all devices
- **Bevelled Holes**
All cable holes are bevelled on both sides providing a smooth finish for maximum cable protection
- **Custom Panels**
We drill or cut panels to any specification

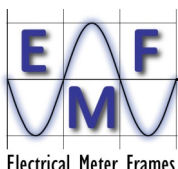

Single Phase Meters

Three Phase Meters
(including option for service fuse holders & Neutral Link)
